

ROAD SWEEPERS

STREAMLINE GENERATION

- ⊕ High suction performance
- ⊕ Optimised aerodynamics
- ⊕ More water
- ⊕ Air circulation system

VIAJET 4

At a glance

- Truck mounted sweeper with body system capacity of 4.3 m³
- To be mounted on standard chassis from 7,5 t up

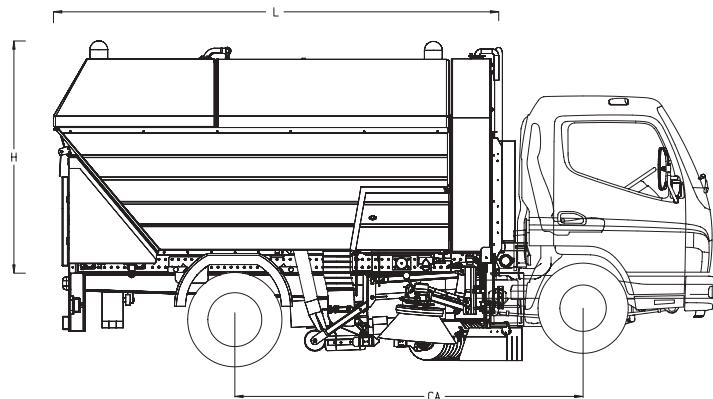

Features

- Highest body volume (4 m³ DIN EN 15429-1) on small standard chassis
- High load capacity over 3 t because of light-material design
- High-grade hopper made of stainless steel and GFK
- High-emptying (1,500 mm according to chassis type) for universal unloading e.g. into skips
- High transport speed up to 90 km/h
- Mobile compact road sweeper with wheel base starting from 2,800 mm
- All-purpose because of hopper with tiltable roof
- Sweeping with less particular matter because of unique FAUN air recycling system
- Place-saving joystick – 3 seats in the cabin
- All benefits of a standard chassis
